

Description

- ◆ SDS have been incumbent design engineers for in excess of 10 years, within this period we have undertaken many planned and reactive projects. Carrying out detailed design work to proposed new visitors centre and administration facility in the Old Barge House and most recently the replacement of the boiler plant
- ◆ Technical advice is provided on an ad hoc basis to the estate management team ensuring the ongoing condition of this historic landmark development.

Involvement

- ◆ SDS have been appointed by the Caretaking organisation to provide full engineering services support to the ongoing development and maintenance
- ◆ We are the retained M&E Consultant providing advice, feasibility reports, design services for Grade 1 Castle and Village buildings for the National Trust.

Benefits Delivered

- ◆ Knowledge and experience of the building services and the site
- ◆ Surveyed existing services to avoid disruption of existing unforeseen services
- ◆ Careful detailed design and installation to ensure no damage to building fabric of historic significance occurred
- ◆ Consideration was given to the difficulties associated with space and access for services
- ◆ Monitoring of the contractors activities to ensure the installation meets with the design intent.

St Michael's Mount Estate is situated on a tidal island located 366 metres off the Mount's Bay Coast of Cornwall
